- Projects Implementation Residential and Commercial.

System Consultation
& Design.

Supply The Products
of Each System.

Installation, Testing
& Commissioning.

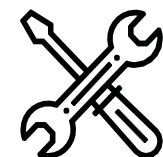

Customer training.

Hands Training for
Dealers, Installers.

Maintenance & after
Sales Service.

Surveillance Systems

What Can We Offer

Surveillance systems are an essential part of securing your home or business. That is why smart zone designs network cameras to meet various needs from general video surveillance to video content analytics based on deep learning algorithms and beyond.

Rendering high-quality images across a range of lighting conditions while minimizing requirements on storage and bandwidth and providing data-powered situational awareness to help you make smart decisions, our network cameras are the ideal choice for hundreds of application scenarios.

Video Management System

What Can We Offer

When used independently, or as part of an integrated security solution, an intrusion alarm system's function is to detect intruders and send notifications in the case of a security event.

Intrusion alarm systems can consist of many different devices including door contacts, glass break sensors, motion detectors, sirens, and strobes just to name a few. By utilizing an intrusion alarm system, a would-be intruder can be detected when attempting to enter a secured area, and an audible or visual alarm can be activated on-site while simultaneously sending an alert to an alarm monitoring station, where it is handled by trained operators as predetermined by the customer.

Fire Alarm System

What Can We Offer

Fire alarm system is designed to alert us to an emergency so that we can take action to protect ourselves, staff and the general public. Fire alarms are found in offices, factories, and public buildings, they are a part of our everyday routine but are often overlooked until there is an emergency at which point, they might just save our lives. Whatever the method of detection is, if the alarm is triggered, sounders will operate to warn people in the building that there may be a fire and to evacuate. The fire alarm system may also incorporate a remote signal system which could then alert the fire brigade via a central station.

Certified From The General Directorate Of Jordan Civil Defence

Al-Khader supplies effective firefighting systems for buildings of all sizes and types. We will customize all firefighting systems so that they provide your property with the highest level of fire protection. Al-khader will survey your property and work with you to ensure that our building firefighting systems meet your requirements.

Sound System

Home audio systems are audio electronics intended for home entertainment use, such as amplifiers, speakers, music centers, surround sound, and home cinema. Home audio generally does not include standard equipment such as built-in television speakers, but rather accessory equipment, which may be intended to enhance or replace standard equipment. To have a better sound in your home discover our high-quality professional loudspeaker systems for single and multi-zone.
